Supporting Evidence: Mr. Olds provided a urine sample on November 12, 2013, which tested presumptive positive for amphetamines. He adamantly denied illegal drug use so the sample was sent to the lab for further analysis.

On November 20, 2013, the results of Mr. Olds' urinalysis test were received from Alere Toxicology. The lab report indicates that the sample Mr. Olds provided was positive for amphetamines, specifically for methamphetamine. The sample was also identified as a dilute specimen, suggesting that Mr. Olds attempted to adulterate his urine sample in order to avoid detection of his drug use.

Mr. Olds was placed on random urinalysis testing on November 13, 2013. On November 20, 2013, Mr. Olds failed to report as directed to provide a urine sample for testing.

The U.S. Probation Office respectfully recommends the Court issue a warrant for the arrest of the defendant to answer the allegations contained in this petition.

I declare under penalty of perjury that the foregoing is true and correct.
